

Visa Card Security Features

Embossed Visa Card

Unlike an embossed Visa card with raised numbers, letters, and symbols, the unembossed card has a smooth, flat surface. The security features are the same as those of an embossed card. Any difference to the card appearance are noted here.

Unembossed Visa Card

Unlike an embossed Visa card with raised numbers, letters, and symbols, the unembossed card has a smooth, flat surface. The security features are the same as those of an embossed card. Any difference to the card appearance are noted here.

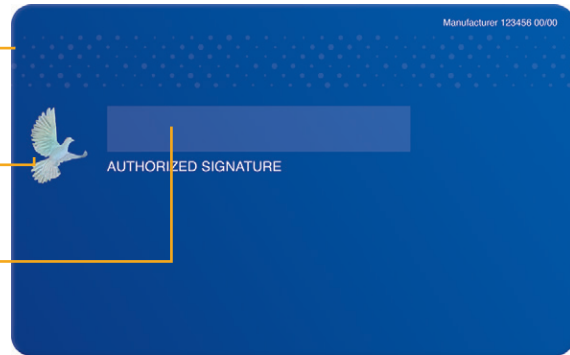

NEW Quick Read account information is thermal or laser printed

Visa Brand Mark

NEW Custom magnetic stripe matches color of card background

NEW Silouetted Visa Dove Design Hologram must be displayed on the back of the card

Cardholder signature in digital format or signed on the signature panel

Visa Mini Card

A Visa Mini Card is a miniature version of a standard size Visa Card

Visa Vertical Card

This card has a vertical orientation and account information is laser printed on the card, not embossed. It includes a magnetic stripe just like its embossed counterpart, and a card verification code on the back.
